ЗАТВОРЫ ПОВОРОТНЫЕ

ТЕХНИЧЕСКИЕ ХАРАКТЕРИСТИКИ

GFB

GFB, double flanged butterfly valve, has an eccentric structure

enabling smooth operation and tight shut-off at any condition.

Rubber lining is applicable to the inner body for anti-corrosion

duty to prevent rust and corrosion on the body.

Basically **GFB** has a ring seat made of rubber, yet, as an option,

it has a teflon or metal seat as per working condition.

Flange Rating

ANSI CL. 150 / PN 10

Nominal Diameter

DN50(2") to DN300(12")

Temperature Range

-40°C (-40 F) to 175 C (350°F)

Working Pressure

Max. 6 Bar

Features

- virgin PTFE liner
- one piece PFA encapsulated disc-stem
- silicone back-up ring
- bi-directional sealing
- double structured stem packing
- low operating torque

Applications

- general & petro chemical
- pulp / paper
- food and beverage
- steel and iron mill
- sugar refining
- sewage

Operating

- manual hand lever / worm gear
- pneumatic actuator
- electric actuator

Options

- anti-static device
- manual operator locking device
- plain disc (non-coated)
- mirror polished disc

BWD

BWD series, which has two(2) metal seats, is primarily Demanded by a district heating system and thermal plant where a Maintenance Free valve is required.

Since the **BWD** valve is welded onto the pipeline, it is made of best grade of materials and designed for a long life and a reliable performance.

BWD, which is available for both butt weld and flange end connection, has a wide range of application from vacuum to high pressure and from low to high temperature.

BWD, which is available for both butt weld and flange end connection, has a wide range of application from vacuum to high pressure and from low to high temperature.

Specifications

Flange Rating	ANSI CL. 150 / CL. 300
Nominal Diameter	DN200(8") to DN1500(60")
Temperature Range	Up to 650 C (1200°F)
Working Pressure	Full pressure rating
Features	- butt weld end - tight shut - off at bi-flow direction - double metal seated sealing - light weight, compact design & easy Installation - robust construction - anti blowout shaft design - maintenance free design
Applications	- district heating system - gas industry - combined thermal power plant

Operating	- manual worm gear - pneumatic actuator - electric actuator
Options	- manual operator locking device - bonnet / stem extension - stellite on disc with an inconel seat - disc ENP coating
